

High Speed Inertial Profiler Certification

INTRODUCTION: High Speed Inertial Profilors (HSIP) used for testing on WYDOT projects featuring SS-400B, which requires contractor-based testing for both profile analysis and pavement smoothness, **must be certified by WYDOT each year before construction season.**

WHO SHOULD ATTEND: Owners of HSIP who wish to perform testing on WYDOT Construction Projects featuring SS-400B and Section 400 of the 2021 Specification Book.

Note: This certification course is not an introductory program nor is it an Operator Certification Course. Applicants wishing to be certified as an operator should apply for the separate Operator Certification Course. It is advised that applicants have experience in smoothness testing of pavements. Additionally, applicants should be thoroughly knowledgeable in the operation of their inertial profiler and should be able to provide files from their vehicles by email.

WHAT TO BRING: Attendees must bring the following items:

1. High Speed Inertial Profiler (please be highly familiar with the operation of your inertial profiler. It should be the same vehicle you intend to use during testing of projects in 2021)
2. Height blocks for HSIP
3. Copy of certification procedures (will be provided if attendee does not have)

AGENDA:

HSIP Certification Courses are in the vicinity of the WYDOT Headquarters Complex in Cheyenne, WY. Operators will not meet this year in person.

Each vehicle will need to run both courses prior to May 31, 2021. Previous Certification will expire on May 31, 2021. See Map for locations. Please make sure to email all files to sarah.rickgauer@wyo.gov in .PPF format.

Certifications will be mailed to qualified vehicles by June 15, 2021. Email notification will be sent for confirmation as well.

The participants must make their own hotel arrangements, if necessary.

COST: \$100 – Please make checks payable to WYDOT
